

Coin Combinations

Family Note In today's lesson, your child practiced writing amounts of money. For example, in Problem 1, 10 pennies can be written as 10¢ or \$0.10. Your child also showed different groups of coins that have the same monetary value. For example, your child could show 62¢ with 2 quarters, 1 dime, and 2 pennies; or 4 dimes, 4 nickels, and 2 pennies. For Problem 2, help your child find items in newspaper or magazine ads and think of different combinations of coins and bills to pay for the items.

Please return this Home Link to school tomorrow.

- 1.** Pretend that you have 10 of each kind of coin.

How much is that in all?

10 pennies = _____

10 nickels = _____

10 dimes = _____

10 quarters = _____

10 half-dollars = _____

Total = _____

- 2.** Find two ads in a newspaper or magazine for items that cost less than \$3.00 each.

- ◆ Ask for permission to cut out the ads.
- ◆ Cut them out and glue them onto the back of this page.
- ◆ Draw coins to show the cost of each item.

(If you can't find ads, draw pictures of items and prices on the back of this page.)
