

HOME LINK
10•9**Counting by 10s, 100s, and 1,000s****Family Note**

In this lesson, your child used place value to count by 10s, 100s, and 1,000s. For Problems 1 and 2, listen carefully to find out if your child counts quickly and accurately. Help your child complete the table in Problem 3. If necessary, have your child use a calculator to find the answers. Ask your child to describe any patterns he or she sees in the completed table.

Please return this Home Link to school tomorrow.

- 1.** Show someone at home how to count by 100s from 0 to 1,000. Record your counts.

- 2.** Now count by 1,000s from 0 to 10,000. Record your counts.

- 3.** Complete the table.
