

# Comparing Costs

**Family Note**

In today's lesson, your child solved subtraction number stories involving money amounts. Ask your child to explain how he or she solved each of the subtraction problems below.

Encourage your child to use estimation before solving each problem. Ask such questions as: *Is the difference in cost between the crayons and glitter more or less than \$1.00? (less)*

*Please return this Home Link to school tomorrow.*

Crayons

Glitter

Coloring Pencils

Glue Stick

In Problems 1–4, circle the item that costs more.

Then find how much more.

1. glue stick or crayons

How much more? \_\_\_\_\_

3. glitter or coloring pencils

How much more? \_\_\_\_\_

5. Carlos bought a glue stick. He paid with a \$1 bill. How much change should he get?
- \_\_\_\_\_

2. glue stick or glitter

How much more? \_\_\_\_\_

4. coloring pencils or crayons

How much more? \_\_\_\_\_

6. Solve.

$$\$1.47 + \$0.75 = \underline{\hspace{2cm}}$$
