

Fractions of Collections

**Family Note**

In this lesson, your child learned to use fractions to name part of a collection of objects. For example, your child could identify 2 out of 4 objects as $\frac{2}{4}$ or $\frac{1}{2}$. Show your child how to use pennies to act out Problem 1. Help your child collect household items that can be separated into fractional parts—or any other items that have fractions written on them. Encourage your child to bring these items to school for the class's Fractions Museum.

Please return this Home Link to school tomorrow.

**1.**

Three people share 12 pennies. Circle each person's share.

How many pennies does each person get? _____ pennies

$\frac{1}{3}$ of 12 pennies = _____ pennies.

$\frac{2}{3}$ of 12 pennies = _____ pennies.

Practice

Solve.

2. $68 - 24 = \underline{\hspace{2cm}}$

4. $\begin{array}{r} 65 \\ - 27 \\ \hline \end{array}$

5. $\begin{array}{r} 64 \\ + 26 \\ \hline \end{array}$

3. $53 + 45 = \underline{\hspace{2cm}}$

Unit

Cars

Ask someone at home to help you find more things to bring to school for the Fractions Museum.
