Three or More Addends

Family Note This Home Link provides practice in looking for combinations that make addition easier. Guide your child to look for combinations that add up to 10, 20, 30, 40 and so on. Then add the rest of the numbers.

Please return this Home Link to school tomorrow.

Remember that when you add:

- ◆ The numbers can be in any order.
- ◆ Some combinations make the addition easier.

Add. Write the numbers in the order you added them. Tell someone at home why you added the numbers in that order.

Example:

$$5 + 17 + 25 + 3 = \underline{50}$$

I added in this order:

$$\underline{5 + 25 + 17 + 3}$$

1. $6 + 18 + 14 = \underline{\hspace{2cm}}$

I added in this order:

2. $125 + 13 + 75 = \underline{\hspace{2cm}}$

I added in this order:

3. $15 + 6 + 14 + 5 = \underline{\hspace{2cm}}$

I added in this order:

4. $33 + 22 + 8 + 7 = \underline{\hspace{2cm}}$

I added in this order:

5. $150 + 215 + 300 + 50 + 200 = \underline{\hspace{2cm}}$

I added in this order:

Three or More Addends *continued*

Solve these number stories.

6. Nico's baby brother has a basket of wooden blocks. 18 blocks are red, 15 are blue, and 22 are yellow. How many red, blue, and yellow blocks are in the basket?

Answer the question: _____ blocks

Number model: _____

Total		
Part	Part	Part
