

Division Number Stories

Family Note

Help your child solve the division number stories by using counters such as pennies or uncooked macaroni to model the problems. Refer to pages 73, 74, 259, and 260 in the *Student Reference Book*. Your child is not expected to know division facts at this time.

Please return this Home Link to school tomorrow.

Use counters or draw pictures to show someone at home how you can use division to solve number stories. Fill in the diagrams.

1. Jamal gave 24 marbles to 4 friends. Each friend got the same number of marbles. How many marbles did each friend get?

_____ marbles

How many marbles were left over? _____ marble(s)

friends	marbles per friend	marbles in all

2. Ellie had 29 cookies to put in 14 lunch bags. She put the same number in each bag. How many cookies did she put in each bag?

_____ cookies

How many cookies were left over? _____ cookie(s)

bags	cookies per bag	cookies in all

3. A sheet of stamps has 46 stamps. A complete row has 10 stamps. How many complete rows are there?

_____ complete rows

How many stamps were left over? _____ stamp(s)

complete rows	stamps per row	stamps in all
